Six decades after the end of World War II, new stories about the conflict continue to emerge. One of these is the subject of this book. Written by an American, Ranne Hemingway-Douglass, and published in the UK by Pen & Sword, it has all the elements of a classic covert adventure tale. As the book explains, the Shelburne was one of the later escape lines that operated within Nazi-occupied Europe. It was established at the end of 1943 by two agents who worked for MI-9, the London-based military intelligence agency responsible for providing assistance to Allied servicemen stranded behind enemy lines. Working with the French Resistance, these agents arranged for groups of Allied airmen to be taken from "safe houses" in Paris to Brittany, where a Royal Navy motor gunboat picked them up from a secluded beach and delivered them back to England. Eight audacious evacuation operations were conducted between January and August, 1944, without the Shelburne Line ever being infiltrated by the Gestapo. Aspects of the Shelburne story have been told previously in memoirs by several of

the participants, including the late MP Airey Neave, who was an MI-9 operative. However, Hemingway-Douglass expands the story to include recollections of some of the local Breton people who were involved with the Line. The second half of the book comprises personal stories of airmen and other individuals who were affiliated with the Shelburne Line or were otherwise caught up in the war in France. A lifelong Francophile, Hemingway-Douglass took eight years to research and write the book. She describes it as a labor of love that pays tribute to the heroism and courage of 'ordinary' people, while reinforcing the fact that war touches everybody. Behavior Change in the Human Services, Sixth Edition continues to provide a systematic introduction and overview of behavioral and cognitive principles and their applications to a wide range of problems and situations encountered in the human service professions. Designed for students and practitioners, the book uses a unique problem-solving framework to demonstrate how behavior change principles can be applied to practice situations. Martin and Sandra Sundel feature a detailed and sequential organization that encourages readers to move progressively through material of increasing complexity and to conduct self-assessments of their knowledge. The Fifth Edition includes eight clinical case studies and many new and engaging examples that address issues such as substance abuse, child behavior problems, assertiveness, marital discord, and developing appropriate social

behaviors. The expanded chapter on intervention techniques incorporates empirically tested behavioral and cognitive strategies for addressing clinical problems such as phobias, anxiety disorders, depression, and other behavioral disorders. Current developments and trends in the field are discussed, including the movement toward evidence-based practice. This comprehensive yet accessible text also features figures, charts, and forms to demonstrate data collection and analysis. Any student pursuing a career in the helping professions, including social work, psychology, counseling, special education, nursing, and psychiatry, will find this book valuable. In a world dependent on digital technologies, business corporations continually try to stay ahead of their competitors by adopting the most updated technology into their business processes. Many companies are adopting digital transformation models, data analytics, big data, data empowerment, and data sharing as key strategies and as service disruptors for information delivery and record management. Higher education institutions have adopted digital service innovation as a core to driving their business processes. Such services are key to ensuring efficiency and improving organizational performance. *Digital Transformation and Innovative Services for Business and Learning* is a collection of innovative research on the latest digital services and their role in supporting the digital transformation of businesses and education.

While highlighting topics including brand equality, digital banking, and generational workforce, this book is ideally designed for managers, executives, IT consultants, industry professionals, academicians, researchers, and students. In March 1944, 76 Allied officers tunneled out of Stalag Luft III. Of the 73 captured, 50 were shot by direct order of Hitler. This is the story of how a British Bobby from Blackpool, Frank McKenna, was sent to post-war Germany on the express orders from Churchill to bring the Gestapo murderers to justice. In a quest that ranges from the devastated, bombed out cities of Europe to the horrors of the concentrations camps, McKenna is relentless in his pursuit. A gripping read set in the aftermath of World War II. Travel as a concept is universally attractive and the opportunities for fun, engaging branding and marketing in this sector are arguably limitless. Glamour and appeal aside, travel is a hugely competitive, multi-million pound industry and marketers of all sectors can learn important lessons from it. Catering for mass consumer travel, from business travel and adventure travel, to specialist and niche interests, the providers of escape have been impacted as much by technology as they have by the changing habits and desires of travellers themselves. *The Escape Industry* presents an expert view of travel marketing and branding, focusing particularly on how travel has been utterly transformed for both consumers and providers since the beginning of the 21st

century. Mark Tungate focuses on some of the travel industry's most famous brands and shares how all marketers can learn from the industry's rich experience of digital transition. Tungate traces the evolution of this fascinating industry, from nineteenth century trailblazers such as Thomas Cook and The Ritz, to today's innovations such as TripAdvisor, Couchsurfing and Airbnb, and explores the branding secrets that have enabled them to survive. A lively read full of incidents, anecdotes, unexpected encounters and a ground-breaking report from the final frontier and space tourism, *The Escape Industry* is at the cutting edge of this attractive sector, examining some of the biggest names in the industry. It will take travel and tourism students, as well as marketing and branding practitioners, on a journey to the heart of a rapidly changing business. Sixteen-year-old Devon Mackintosh has always felt like an outsider at Keaton, the prestigious California boarding school perched above the Pacific. As long as she's not fitting in, Devon figures she might as well pad her application to Stanford's psych program. So junior year, she decides to become a peer counselor, a de facto therapist for students in crisis. At first, it seems like it will be an easy fly-on-the-wall gig, but her expectations are turned upside down when Jason Hutchins (a.k.a. "Hutch"), one of the Keaton's most popular students, commits suicide. Devon dives into her new role providing support for Hutch's friends, but she's haunted by her own attachment to him. The two

shared an extraordinary night during their first week freshman year; it was the only time at Keaton when she felt like someone else really understood her. As the secrets and confessions pile up in her sessions, Devon comes to a startling conclusion: Hutch couldn't have taken his own life. Bound by her oath of confidentiality—and tortured by her unrequited love—Devon embarks on a solitary mission to get to the bottom of Hutch's death, and the stakes are higher than she ever could have imagined. Read an excerpt of *Escape Theory*. <http://bit.ly/Yi5DZf> **ESCAPE FROM TYRANNY** The Path to Freedom Caught between their desire to practice their faith freely and the dictates of a state religion, Emmett and Winifred flee their native Germany for America. They soon find that tyranny wasn't left behind in their homeland for it exists wherever man's evil desires are left unchecked. Their moral courage influences those they encounter as they face danger, disease, and heartbreak. Emmett's strong desire to work his own land is passed on to their son, Hans, who also struggles with love, natural disasters, conflicts with Indian tribes, and personal tragedy in his quest to find freedom. All this is because freedom has a price, and it costs everything to achieve it! Asserts that 250 years ago, some parts of the world began to experience sustained progress, opening up gaps and setting the stage for today's hugely unequal world and examines the United States, a nation that has prospered but is today experiencing

slower growth and increasing inequality. “Oh, you live on a boat? That must be really cold in the winter...” Or, “Oh, you live on a boat? It must be great being so close to nature...” Or, “Oh, you live on a boat? It must be fantastic to be able to go wherever you like, whenever you like...” *Narrow Escape* sets out to dispel these commonly held public myths. From how to avoid assassination by ninja stealth ducklings, through definitive proof that kittens are aliens and the best way to sleep at forty-five degrees, to the importance of having the right boating equipment; (a child's plastic sledge and a never ending supply of cotton wool balls). This month by month account of one family's liveaboard year takes a firmly tongue in cheek look at what it takes to enjoy the 'idyllic' lifestyle. ***Finalist for the Gilder Lehrman Lincoln Prize*** Henry Louis Gates, Jr: "A stunning tale of a little-known figure in history." Candice Millard: "Be Free or Die makes you want to stand up and cheer." The astonishing true story of Robert Smalls' amazing journey from slave to Union hero and ultimately United States Congressman. It was a mild May morning in Charleston, South Carolina, in 1862, the second year of the Civil War, when a twenty-three-year-old slave named Robert Smalls did the unthinkable and boldly seized a Confederate steamer. With his wife and two young children hidden on board, Smalls and a small crew ran a gauntlet of heavily armed fortifications in Charleston Harbor and delivered the valuable vessel and the massive guns it carried to

nearby Union forces. To be unsuccessful was a death sentence for all. Smalls' courageous and ingenious act freed him and his family from slavery and immediately made him a Union hero while simultaneously challenging much of the country's view of what African Americans were willing to do to gain their freedom. After his escape, Smalls served in numerous naval campaigns off Charleston as a civilian boat pilot and eventually became the first black captain of an Army ship. In a particularly poignant moment Smalls even bought the home that he and his mother had once served in as house slaves. Cate Lineberry's *Be Free or Die* is a compelling narrative that illuminates Robert Smalls' amazing journey from slave to Union hero and ultimately United States Congressman. This captivating tale of a valuable figure in American history gives fascinating insight into the country's first efforts to help newly freed slaves while also illustrating the many struggles and achievements of African Americans during the Civil War. While the Naval base in Guantánamo Bay, Cuba is well-known for its infamous prison camp, few people are aware of its prior use as an immigrant detention center for Haitian and Cuban refugees. Beginning in August 1994, the United States government declared that thousands of Cubans who had launched themselves into the Florida Straits on rickety rafts were "illegal refugees" and sent them to join over fifteen thousand Haitians already being held on Guantánamo after fleeing a

violent coup in Haiti. *Escape to Miami* recounts the gripping stories of the rafters who were detained in Guantánamo during the 1994-1996 Cuban Rafter Crisis. After working in the camps for a year as an employee of the U.S. Justice Department, Elizabeth Campisi conducted life history interviews with twelve of the rafters, chronicling their departures from Cuba, their rafting trips, life on the base, and their initial experiences in Cuban Miami. Through these remarkable narratives, the book details the ways in which the rafters used creative expression, such as performance and artwork, to cope with the traumas they experienced in the camp. Campisi explores these coping mechanisms, showing that, when people work through individually-traumatic experiences as a group, the new meanings they create during that process can come together to change existing cultures or create new ones. Vivid and engaging, *Escape to Miami* gives voice to the untold stories of Guantánamo. This book is a must-read for anyone interested in policy, Latin American history, and human rights. This seventh edition of Hall and Greeno's leading textbook has been reviewed and updated in relation to the latest building and water regulations, new technology, and new legislation, and even more design calculations have been added. In addition, topics such as: alternative sources of natural energy, solar, ground source, heat pumps, renewable energy sources, geothermal methods, and wind power, are now covered. *Building Services Handbook*

summarises the application of all common elements of building services practice, technique and procedure, to provide an essential information resource for students as well as practitioners working in building services, building management and the facilities administration and maintenance sectors of the construction industry. Information is presented in the highly illustrated and accessible style of the best-selling companion title *Building Construction Handbook*. THE comprehensive reference for all construction and building services students, *Building Services Handbook* is ideal for a wide range of courses including NVQ and BTEC National through Higher National Certificate and Diploma to Foundation and three-year Degree level. The clear illustrations and complementary references to industry Standards combine essential guidance with a resource base for further reading and development of specific topics. This chapter highlights various ways Asia's growth has affected the world economy. The chapter also shows that if currency trends continue, the Asian economy is expected to be larger than that of the United States and Europe combined. Some Asian countries offer sophisticated financial markets and are centers for technological innovation, while others are largely agricultural. The study shows that the region is home to 700 million poor people, about 65 percent of the world's poor—a figure that stands in stark relief against Asia's

economic strength and growing prosperity. The chapter also references the inquiry by the managing editor of the *Journal of Economic Perspectives* into the rich and sometimes tortured relationship between economics and virtue. This book is based on the work of the YEEES Research Centre, an international network of scientists from partner universities in Germany, Mozambique, Namibia and South Africa. It presents inter- and transdisciplinary research that explores different ways of understanding resilience, an essential characteristic for systems, organizations and people - providing them with strength in the face of attacks and challenges, and both enabling and fostering constant adaptation and improvement. Building resilience to face today's ever-changing societal and environmental realities requires unbiased research activities that transcend the borders of countries and academic disciplines alike. The research addressed in this book, thus, is multidisciplinary and includes contributions to areas such as sustainable agriculture, entrepreneurial ecosystems, and smart communities, as well as groundbreaking work on skills development and ICT education. Highlighting the variety of research activities and their outcomes, this book offers a valuable resource for researchers and practitioners in the fields of sustainable resilience development. Rob, Dom and Mikey were fed up with the corporate treadmill. When they decided to change careers, they looked for a website to

help them escape - except there wasn't one. So they started their own. Three years later and they have started a movement called Escape the City. Over 100,000 people have joined www.escapethecity.org in pursuit of exciting and unconventional careers. They are the first online start-up in the world to raise more than £500,000 in investment equity crowdfunding - and they did this entirely from their own membership. The Escape Manifesto is the book that the guys wish they had read three years ago on the London Underground when they were commuting back and forth from their corporate cubicles. It is an inspirational call to action, packed with practical advice and encouragement. If you work in a corporate job that doesn't make you tick and you have ever wondered whether there is more to life, this book is for you. Step off the corporate treadmill - find an exciting job, start your own business, or go on a big adventure. Stop dreaming, start planning and do something different! Reader Feedback "Fab book- inspired me to plan my escape in Jan 2014 to India to clear my head after 29 years in social work then starting my own business. If not now, when?!" - Fionna "My inspiration to take the step out of banking was driven by your book. I had been thinking about it for about a year but I kept putting off leaving the salaried job, that is until a friend left work and handed me a copy." - Selina "The Escape Manifesto is a fantastic book. Page after page really hit the note with me..... I'm leaving my city job to take some time out travelling South

America and see what happens!" - Scott "The Manifesto has really helped me in my decision and continuing motivation to leave consulting. So, I'd like to say a massive thank you." - Victoria "I'm so excited to have 'escaped'!! Thanks to the Escape Manifesto for giving me the motivation and push I needed to seek out opportunities I can be passionate about." - Australian Lawyer in London "I'd like to let you know that your website and book! helped me 'escape' my job as management consultant in the Netherlands. I will be moving to Sri Lanka this November to work as general manager of a turtle conservation project, with my girlfriend. I found the job on your site. I'm so excited!" - Andre "I lost track of the number of times I stopped to read out passages to my wife which expressed the exact same thoughts and emotions as I'd been feeling myself, it's always good to know you're not the first to have felt this way. I got a bit carried away with the highlighter and have built a to-do list off the back of it." - Graham "Loving the Escape manifesto, I'm planning my escape from finance to conservation for August 2014." - Scott "Your book is by my bed - making notes from the money chapter... hopefully I'll have news soon." - Victoria "I'm reading your book right now. I'm halfway through but I couldn't resist contacting you before I finish it. It is the perfect reference for finding a new career path and escaping the status quo and pressure from society - very good book!" - Daniel "Your book has made me feel so good about my situation and I now

believe I'm doing all the right things to give my plans a good old go. Life is so short and you have nothing to lose. Nothing!!!" - Ed "Even the shittiest day brightens up when I read your blog, your book or just the pics you post on Facebook." - Dagmar "Well chaps, I did it! Quit my job in senior leadership in a blue chip corporate. Now what???? Halfway thru y Coal mine disasters in the United States are relatively rare events; many of the roughly 50,000 miners underground will never have to evacuate a mine in an emergency during their careers. However, for those that do, the consequences have the potential to be devastating. U.S. mine safety practices have received increased attention in recent years because of the highly publicized coal mine disasters in 2006 and 2010. Investigations have centered on understanding both how to prevent or mitigate emergencies and what capabilities are needed by miners to self-escape to a place of safety successfully. This report focuses on the latter - the preparations for self-escape. In the wake of 2006 disasters, the U.S. Congress passed the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), which was designed to strengthen existing mine safety regulations and set forth new measures aimed at improving accident preparedness and emergency response in underground coal mines. Since that time, the efforts of the National Institute of Occupational Safety and Health (NIOSH) and the Mine Safety and Health Administration (MSHA) have

contributed to safety improvements in the mining industry. However, the Upper Big Branch mine explosion in 2010 served as a reminder to remain ever vigilant on improving the prevention of mine disasters and preparations to help miners survive in the event of emergencies. This study was set in the context of human-systems integration (HSI), a systems approach that examines the interaction of people, tasks, and equipment and technology in the pursuit of a goal. It recognizes this interaction occurs within, and is influenced by, the broader environmental context. A key premise of human-systems integration is that much important information is lost when the various tasks within a system are considered individually or in isolation rather than in interaction with the whole system. Improving Self-Escape from Underground Coal Mines, the task of self-escape is part of the mine safety system. The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers, and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem

services, integrating natural and social science (including economics). Collectively the chapters, written by the world's leading authorities, demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms, so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction, and the creation of a green economy in developing and developed world contexts. After escaping the ultra conservative and cruel upbringing of her father in Pakistan, Yasmin flees to hope of a better life in the United Kingdom, only to find herself forced into slavery by human trafficker Lachlan, whose skill as a computer hacker means he can hide his victims within the country under supposed legal working status. Forced into a world of rape, murder and slavery, Yasmin's only strength comes from her faith but it is Adam, whose stolen phone holds the key to Lachlan's technological empire, who must find strength after an attack that has left him traumatised and fearing the outside world. The gripping, vividly told story of the largest POW escape in the Second World War - organized by an Australian bank clerk, a British jazz pianist and

an American spy. In August 1944 the most successful POW escape of the Second World War took place - 106 Allied prisoners were freed from a camp in Maribor, in present-day Slovenia. The escape was organized not by officers, but by two ordinary soldiers: Australian Ralph Churches (a bank clerk before the war) and Londoner Les Laws (a jazz pianist by profession), with the help of intelligence officer Franklin Lindsay. The American was on a mission to work with the partisans who moved like ghosts through the Alps, ambushing and evading Nazi forces. How these three men came together - along with the partisans - to plan and execute the escape is told here for the first time. The Greatest Escape, written by Ralph Churches' son Neil, takes us from Ralph and Les's capture in Greece in 1941 and their brutal journey to Maribor, with many POWs dying along the way, to the horror of seeing Russian prisoners starved to death in the camp. The book uncovers the hidden story of Allied intelligence operations in Slovenia, and shows how Ralph became involved. We follow the escapees on a nail-biting 160-mile journey across the Alps, pursued by German soldiers, ambushed and betrayed. And yet, of the 106 men who escaped, 100 made it to safety. Thanks to research across seven countries, The Greatest Escape is no longer a secret. It is one of the most remarkable adventure stories of the last century. Services are key activities in the globalization of the economy and also underlie the quality of life of local residents. The

advanced work presented in this book was selected from the proceedings of the First International Conference on Serviceology (ICServ2013), held October 16–18, 2013 in Tokyo. This book provides a useful overall guide to the state of the art in theory and practice of services for researchers in various fields, including engineering, marketing, economics, and others. This work also facilitates the scientific systematization of services and promotes technological developments for solutions of industrial issues.

In early 1942 the Germans opened a top-security prisoner-of-war camp in occupied Poland for captured Allied airmen. Called Stalag Luft III, the camp soon came to contain some of the most inventive escapers ever known. They were led by Squadron Leader Roger Bushell, code-named 'Big X', who masterminded an attempt to smuggle hundreds of POWs down a tunnel built right under the noses of their guards. The escape would come to be immortalised in the famous film *The Great Escape*, in which the ingenuity and bravery of the men was rightly celebrated. The plan involved multiple tunnels, hundreds of forged documents, as well as specially made German uniforms and civilian clothing. In this book Guy Walters takes a fresh look at this remarkable event and asks the question, what was the true story, not the movie version? He also examines what the escape really achieved, and the nature of the man who led it. *The Real Great Escape* is the first account to draw on a newly-released cache of documents from Roger Bushell's family, including letters from Bushell, that reveals much about this remarkable man, his life and experiences during the war, and the planning of the escape attempt that was to make him famous. The result is a compelling and authoritative re-evaluation of the most iconic escape story of the Second World War. A thrilling, moment by moment account of an epic World War II escape and the real-life

adventures that followed. On August 30, 1942 - 'Zero Night' - 40 Allied officers staged the most audacious mass escape of World War II. Months of meticulous planning and secret training hung in the balance during three minutes of mayhem as the officers boldly stormed the huge double fences at Oflag Prison. Employing wooden ladders and bridges previously disguised as bookshelves, the highly coordinated effort succeeded and set 36 men free into the German countryside. Later known as the 'Warburg Wire Job', fellow prisoner and fighter ace Douglas Bader once described the attempt as 'the most brilliant escape conception of this war'. The first author to tackle this remarkable story in detail, historian Mark Felton brilliantly evokes the suspense of the escape and the adventures of those escapees who managed to elude the Germans, as well as the courage of the civilians who risked their lives to help them in enemy territory. Fantastically intimate and told with a novelist's eye for drama and detail, this rip-roaring adventure is all the more thrilling because it really happened. This powerful memoir of a WWII POW recounts his incredible journey from joining the British Army to life as a prisoner of the Imperial Japanese military. Peter Jackson was young and recently married when he was drafted into the British Army at the start of World War II. He was sent to Singapore just as the city was being evacuated, and within days he was taken prisoner by the Imperial Japanese Army. Peter was one of the very few to survive the hardship, illnesses and

brutality that followed. Like so many he was forced into labor, first in Singapore and then on the infamous Thai-Burma railway. But while there, he remarkably escaped with seven other soldiers. When recaptured, he was treated harshly. Jackson's memoir brings to life both the characters of his comrades and the Japanese soldiers and guards he encountered. Though the experience was truly harrowing, and many of his fellow prisoners despaired at losing years of their young lives, Jackson maintained a sense of hope that they would one day return home. The everything you need to give an outstanding speech book, complete with all original material, written by a professional speechwriter. Robert P. Watson provides the definitive account of the Confederacy's infamous Libby Prison, site of the Civil War's largest prison break. Libby Prison housed Union officers, high-profile foes of the Confederacy, and political prisoners. Watson captures the wretched conditions, cruel guards, and the story of the daring prison break, called "the most remarkable in American history." The Shah is thrown out of Iran and the nation's turmoil becomes world headlines. Caught in this shifting world of fanaticism, ambition, duplicity, heartbreak and violent death are the foreign helicopter pilots who have been servicing the oilfields up and down the country. Their one objective now is to make a bold concerted escape, with their helicopters, to safety across the Gulf. But one of the pilots, Erikki, the blond Finnish pilot, is married to a

beautiful high-born Iranian wife, Azadeh, and this story is about what happens to them. A text based on practical aspects of mental health treatment with a careful analysis of clinical and career counseling strategies aimed at helping to inspire new and established practitioners with care planning, service delivery, and regulatory compliance. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. Tricky Design responds to the burgeoning of scholarly interest in the cultural meanings of objects, by addressing the moral complexity of certain designed objects and systems. The volume brings together leading international designers, scholars and critics to explore some of the ways in which the practice of design and its outcomes can have a dark side, even when the intention is to design for the public good. Considering a range of designed objects and relationships, including guns, eyewear, assisted suicide kits, anti-rape devices, passports and prisons, the contributors offer a view of design as both progressive and problematic, able to propose new material and human relationships, yet also constrained by social norms and ideology. This contradictory, tricky quality of design is explored in the editors' introduction, which positions the objects, systems, services and 'things' discussed in the book in relation to

the idea of the trickster that occurs in anthropological literature, as well as in classical thought, discussing design interventions that have positive and negative ethical consequences. These will include objects, both material and 'immaterial', systems with both local and global scope, and also different processes of designing. This important new volume brings a fresh perspective to the complex nature of 'things', and makes a truly original contribution to debates in design ethics, design philosophy and material culture. In this second volume of the Called Out of Darkness trilogy, Father Robert Spitzer, S.J., draws together some of the best advice given by Catholic spiritual masters across the ages and brings it into harmony with modern scientific research, offering practical ways to live out the gospel in our busy days. It is a roadmap to a deeper relationship with the Lord and to authentic transformation through the imitation of Christ. Giving evidence that Jesus established just one Church, with Peter as its head, Spitzer shows that the Catholic Church—with its rich array of sacraments, teachings, prayer traditions, and lived examples of holiness—continues to be fertile ground for profound Christian conversion. But no true conversion is purely spiritual; it must bear fruit in our daily lives. Father Spitzer guides readers through the workings of moral transformation, with detailed sketches of all the cardinal and theological virtues, especially love. Using insights from Saint Ignatius of Loyola, as well

as from modern psychology, *Escape from Evil's* Darkness concludes with an in-depth study of the sacrament of confession and the staggering power of God's loving mercy. One night in 1944, eighty airmen escaped a German POW compound in Poland. The event became known as "The Great Escape." Ted Barris writes of the planners, task leaders, and key players in the escape attempt, those who got away, those who didn't, and their families at home. Kendra has always felt overshadowed by her older brother, Grayson, whose OCD forces him to live a life of carefully coordinated routines. To Kendra, the only way she can stand out next to Grayson is to be perfect, and she has perfection down to an art -- until a cheating scandal threatens her flawless reputation. Behind the wheel of her car, with Grayson asleep beside her, Kendra decides to drive away from it all -- with enough distance, maybe she'll be able to figure everything out. But even in the midst of the road trip's flat tires, gas-station food stops, and detours to quirky roadside attractions, eventually Kendra must stop running and come to terms with herself, her brother, and her past. Isaac Fietlebaum is a fluent speaker of Yiddish and a Talmudic scholar. But he is not your typical Jewish boy. He was born on the planet Hijdor, and he works as a psychiatrist at the student clinic of the Transgalactic Merchant Marine Academy on the backwater planet of Polmod. Fietlebaum is coerced into a drug war over the illegal jorftoss plant that bestows immortality. The conflict leads him across the

galaxy, where he fights not only the unusual mental disturbances of aliens, but also a jorftoss killing virus, and a murderous Galactic Intelligence agent, whose immortality depends on his gaining control over the galaxy's last living jorftoss plants. Fietlebaum is driven to defeat this agent, who has kidnapped his grandson. He threatens to kill the boy, Fietlebaum, and the charming schlemiel, Teysoot Motzo, a Janpooran labor leader and hapless crook who accompanies Fietlebaum in his adventures across the galaxy. The most important and recent judgments of the CJEU Considering the ever increasing importance of indirect taxation as a source of revenue for governments, the intensifying complexity of legal framework, and the proliferating number of countries adopting indirect taxation, it is essential to scrutinize how the law is actually applied in practice. The primary driving force in this area is, undoubtedly, the Court of Justice of the European Union. This book analyses selected topics (e.g. the Charter of Fundamental Rights of the European Union and VAT, taxable base and rates, exemptions, and deductions) by examining the most prominent and recent judgments of the Court of Justice of the European Union. Experts from all over the world, not just from academia but also government representatives and tax practitioners, have provided their input and helped us compile what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis. The gripping

story of how the end of the Roman Empire was the beginning of the modern world The fall of the Roman Empire has long been considered one of the greatest disasters in history. But in this groundbreaking book, Walter Scheidel argues that Rome's dramatic collapse was actually the best thing that ever happened, clearing the path for Europe's economic rise and the creation of the modern age. Ranging across the entire premodern world, *Escape from Rome* offers new answers to some of the biggest questions in history: Why did the Roman Empire appear? Why did nothing like it ever return to Europe? And, above all, why did Europeans come to dominate the world? In an absorbing narrative that begins with ancient Rome but stretches far beyond it, from Byzantium to China and from Genghis Khan to Napoleon, Scheidel shows how the demise of Rome and the enduring failure of empire-building on European soil launched an economic transformation that changed the continent and ultimately the world.
